

## Siamese Storz Connections

Siamese storz connections are simply a combination of a storz with a traditional threaded siamese (2-way) FDC. Generally mounted to the exterior wall of a building, siamese storz connections give fire fighters the option of attaching a large diameter hose with storz couplings or a smaller diameter fire hose with 2½" threaded couplings. The one clapper design will close off the non pressurized inlet while permitting flow from the pressurized inlet.

### Specifications:

- Material: Aluminum alloy
- Finish: Powder coated red with anodized storz
- Red plastic plugs & chains included (not pictured)
- Includes storz x F NPT to thread onto pipe (not pictured)

Part #	Size	Finish	Style
SZ11A	4" Female NPT x 4" Storz x (2) 2½" F NST	Red Powder Coat	Single Clapper
SZ11B	4" Female NPT x 5" Storz x (2) 2½" F NST	Red Powder Coat	Single Clapper
SZ11C	6" Female NPT x 5" Storz x (2) 2½" F NST	Red Powder Coat	Single Clapper
SZ11D	6" Female NPT x 4" Storz x (2) 2½" F NST	Red Powder Coat	Single Clapper
