

## Hydrant Diffuser

A hydrant diffuser offers quick and efficient hydrant flow testing. These hydrant diffusers use a dual function, liquid filled gauge, which measures both gallons per minute as well as PSI. They also feature a 2½" female NST swivel so that when connected to the hydrant, the water flow can be aimed in a desirable direction as to not disturb landscape or damage objects in the water's path.

- Rugged aluminum construction
- Gauge face = 4" diameter
- All parts are field replaceable
- 2½" female NST swivel
- Weight = 7.7 lbs
- Optional carrying case available (measures 14.5" L x 19" W x 7.375" H)

| Part #       | Size | Pressure / Flow    | Notes                          |
|--------------|------|--------------------|--------------------------------|
| DIFFUSER100  | 2½"  | 100 PSI / 1680 GPM | Does not include carrying case |
| DIFFUSER160  | 2½"  | 160 PSI / 2120 GPM | Does not include carrying case |
| DIFFUSER100C | 2½"  | 100 PSI / 1680 GPM | Includes carrying case         |
| DIFFUSER160C | 2½"  | 160 PSI / 2120 GPM | Includes carrying case         |
