

## Cable Spools

Lengths of cable are cut to make cable assemblies made in the field with attachment hardware and to make field changes. There is 250ft. of cable on each spool making each spool easy to move around job sites. Cable spools are especially convenient in jobs where many different cable lengths are needed.

Use in combination with Loos attachment hardware to make secure brace connections that are stronger than the cable itself.

### Specifications:

- Pre-Stretched
- Color Coded
- U/L Listed & FBC Certified
- ICC ES Listed
- FBC System Compatible
- Made in the USA
